						240kg

Thickness is 45mm. For quantities required for octagonal features, see page 37, 38.

commonly used product sets

Our Octant and Radius Systems enable many different design options. To assist you to identify and correctly order your chosen option, the following drawings show commonly used Product Sets from our Millstone and Yorkstone ranges.

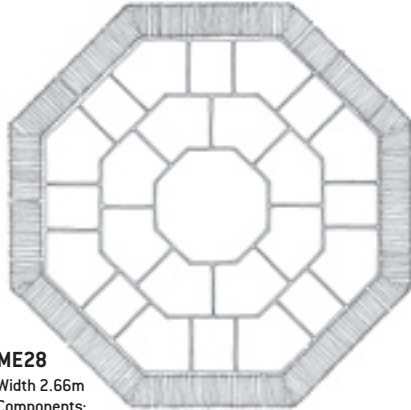

Each drawing has a Product Set number, eg. **ME18** which can be quoted, together with the paving colour required. Also listed against each drawing are the components and quantities included in that set.

Octant Sets include the surrounding Tile on Edge border. If that is not required, omit the last two lines of the component list. The symbol (pk) following a product code indicates the quantity is equal to a full pack of that component.

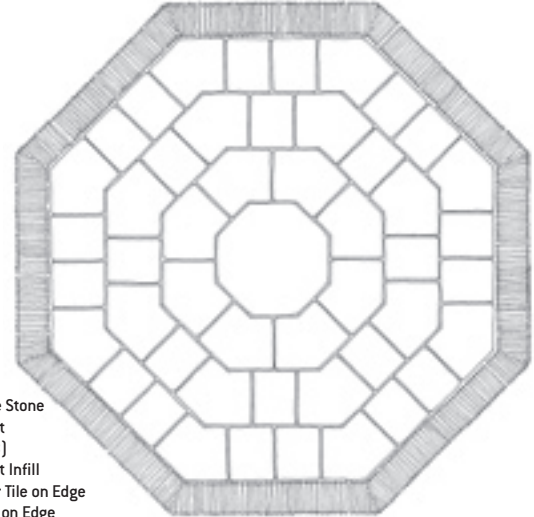

commonly used product sets – petite millstone octant

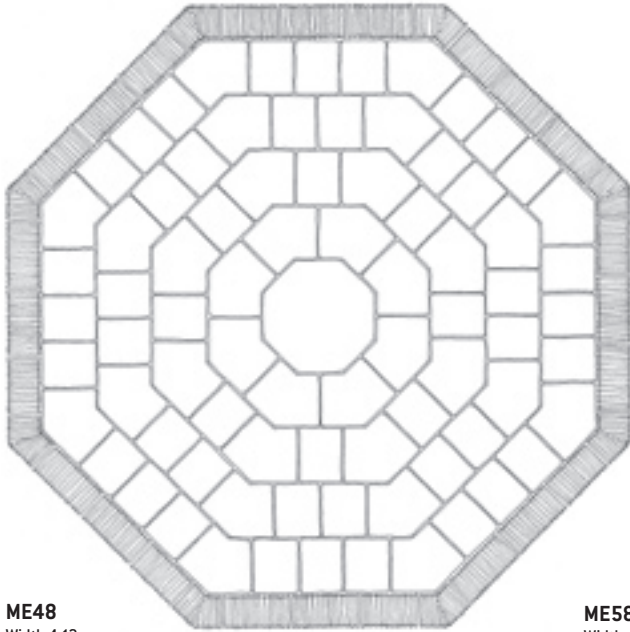

ME18
Width 1.92m
Components:
1 no. Octant Centre Stone
8 no. Petite Octant Cornerstone
