

arctic granite

With its subtly textured surface and wide range of colours, Arctic Granite is perfect in any contemporary design situation. Each of the five colours works well on its own, or in combination. For impact try combining Midnight with Glacier, Blush or Jade. Dusk will provide a softer contrast. The innovative Arctic Granite Revolve feature is meticulously cut from Midnight and Glacier.

Arctic Granite Dusk

Arctic Granite Blush

Types • Glacier • Dusk • Midnight • Blush • Jade

sizes (mm)	m ² per pack	no. per pack	weight/kg per pack	no. per project pack	colours
600 x 600 x 25	18.0	50	1320	24	all
600 x 300 x 25	18.0	100	1320	35	all
300 x 300 x 25	9.0	100	660	34	all
Project Pack	18.0	93 mixed	1320	as above	all

As Arctic Granite is usually laid with minimal joints, the sizes quoted are the actual dimensions. The paving should be laid with the textured face upwards. Arctic Granite can sometimes absorb colour from ordinary Portland Cement. We strongly recommend substituting White Cement in the mortar and adding a PVA, SBR or other bonding agent. For further laying advice see page 137

arctic granite revolve

Types • Glacier / Midnight

Revolve Kit	sizes (mm)	m ² per pack	no. per pack	weight/kg per pack
	2400 x 2400 x 25	5.75	1 kit (73 pcs)	400

For design ideas see page 128

Moisture transparency may be visible in some site conditions resulting in dark patches to surface of the units. This is a natural characteristic of Granite paving.
